

**Study on the Correlation between Prime Density Decay and the Constant $\ln(10)$
in Decimal Expansion Intervals based on Common Difference 90**

Interval Range	Number of Primes	Interval-to-Prime Ratio	Absolute Increase	Prime Density (%)
$[2, 10)$	4	2.25		44.44%
$[10+1, 10^2]$	21	4.28	2.03	23.33%
$[10^2+1, 10^3]$	143	6.29	2.01	15.88%
$[10^3+1, 10^4]$	1,061	8.48	2.19	11.78%
$[10^4+1, 10^5]$	8,363	10.76	2.28	9.29%
$[10^5+1, 10^6]$	68,906	13.06	2.30	7.65%
$[10^6+1, 10^7]$	586,081	15.35	2.29	6.51%
$[10^7+1, 10^8]$	5,096,876	17.65	2.30	5.66%
$[10^8+1, 10^9]$	45,086,079	19.96	2.31	5.01%
$[10^9+1, 10^{10}]$	404,204,977	22.26	2.30	4.49%
$[10^{10}+1, 10^{11}]$	3,663,002,302	24.57	2.31	4.07%
$[10^{11}+1, 10^{12}]$	33,489,857,205	26.87	2.30	3.72%
$[10^{12}+1, 10^{13}]$	308,457,624,821	29.17	2.30	3.42%
$[10^{13}+1, 10^{14}]$	2,858,876,213,963	31.48	2.31	3.17%
$[10^{14}+1, 10^{15}]$	26,639,628,671,867	33.78	2.30	2.95%
$[10^{15}+1, 10^{16}]$	249,393,770,611,256	36.08	2.30	2.77%
$[10^{16}+1, 10^{17}]$	2,344,318,816,620,300	38.39	2.31	2.61%
$[10^{17}+1, 10^{18}]$	22,116,397,130,086,600	40.69	2.30	2.45%
$[10^{18}+1, 10^{19}]$	209,317,712,988,603,000	42.99	2.30	2.32%
$[10^{19}+1, 10^{20}]$	1,986,761,935,284,570,000	45.29	2.30	2.21%
$[10^{20}+1, 10^{21}]$	18,906,449,883,457,800,000	47.60	2.31	2.10%
$[10^{21}+1, 10^{22}]$	180,340,017,203,297,000,000	49.90	2.30	2.01%
$[10^{22}+1, 10^{23}]$	1,723,853,104,917,490,000,000	52.20	2.30	1.91%
$[10^{23}+1, 10^{24}]$	16,510,279,375,742,400,000,000	54.51	2.31	1.83%
$[10^{24}+1, 10^{25}]$	158,410,709,631,795,000,000,000	56.81	2.30	1.76%
